Subj: GARRISON PROPERTY BAR CODE SUITE EQUIPMENT (BCSE)

1. This Garrison Property Management Guide (GPMG), authenticated for Marine Corps use and effective upon receipt, advises Installation Commanders and other selected Activities responsible for the accountability of Garrison Property, of the plan to do a one time BCSE buy to support Garrison Property bar code requirements.
2. Comments and or suggested changes to this GPMG may be submitted to Headquarters, U.S. Marine Corps (Code LFS), 2 Navy Annex, Washington, DC 20380-1785.
3. APPENDICES:
 - A. Garrison Property Bar Code Suites of Equipment
 - B. Garrison Property Bar Code Distribution Plan
 - C. Garrison Property Bar Code Suites Shipping Address List

GARRISON PROPERTY MANAGEMENT GUIDE (GPMG)

1. Introduction

a. Purpose. To publish information concerning the procurement and distribution of bar code scanner and printer suites of equipment (BCSE), funded by Services Branch (LFS), Headquarters Marine Corps (HQMC), to support Garrison Property bar code requirements. The replacement of this one time issue of BCSE, is the responsibility of the using Activity. The guidance provided in this document applies to all personnel responsible for the accountability, reporting, and or disposition of General Personal Property, Plant and Equipment (Garrison Property).

b. Source of Requirement. Per MCO P10150.1 (Garrison Property Policy Manual) all Marine Corps Garrison Property shall use bar coded identification labels to accommodate the use of logistics applications for automated marking and reading equipment for physical inventory purposes. Additionally, under SECNAVINST 7320.10 (DON Personal Property Policies and Procedures), all personal property recorded in the Defense Property Accountability System shall be bar coded within 7 calendar days of receipt. Even items that cannot be physically bar coded (e.g., software telecommunications systems, etc.) should still have bar codes assigned.

c. Point of Contact

TITLE	ADDRESS	TELEPHONE
Special Programs Section (LFS-1)	Headquarters, U.S. Marine Corps 2 Navy Annex Washington, DC 20380-1775	(703)695-6965 Voice DSN 225-6965 Voice (703)695-7453 FAX
AIT Project Officer	MARCORSYSCOM(C4ISR IS) Quantico, VA 22134	(703)784-0983 Voice DSN 278-0983 Voice

2. System Description.

a. The Bar Code Suite of Equipment (BCSE) contains bar-code scanning equipment capable of reading, processing, and printing both linear and two-dimensional barcode symbologies. Data is

transferred electronically to and from information systems in wired mode, via Communication Docking Station or serial cable. Additionally, when optional wireless accessories are added to the suite, the system is capable of operating in a wireless mode via 2.4 Gigahertz (GHz) Radio Frequency (RF). The BCSE identified for this program will be procured from two manufacturers, Symbol Technologies, Incorporated (awarded the DoD Automatic Identification Technology (AIT) and Zebra Technologies Corporation (AIT contract DAAB15-99-D-0015 of Jul 13, 1999). When properly activated and operated in conjunction with the DPAS, the BCSE facilitates the collection of initial source data, reduces inventory recording processing time, improves accuracy of property book (DPAS) entries, and enhances asset visibility.

b. These bar code scanners, sometimes referred to as Portable Data Terminals (PDT), are capable of operating in a wired mode via serial cable and or in the optional wireless mode via 2.4 GHz RF. For more information regarding the PDT RF capabilities and associated equipment, see the Marine Corps User's Logistics Support Summary (ULSS) 007799-15 (Automatic Identification Technology Suit of Equipment) manual.

c. There are two types of bar-code printers, the desktop bar code label printer and the portable label printer. The desktop bar code label printer is intended for the mass production of barcodes. It can generate barcode labels faster and cheaper than the portable bar code label printer. The portable bar-code label printer (procurement is pending DPAS support approval) is intended to produce labels on an as required basis, replacing damaged or missing labels. The portable bar-code label printer plugs directly into the PDT, which is programmed to generate bar-code labels.

d. The following table is a listing of equipment that makes the BCSE (less optional RF capability accessories), see Appendix A, for detail product description:

<u>Suites</u>	<u>QTY</u>	<u>Part Number</u>
Scanner Suite		
- Portable Data Terminal, PDT7240	1	PDT7240-RII60M01
- Communication Docking Station	1	CRD7200-10RU0-000
- Holster, Universal	1	58-40000-002
- Holster, Shoulder Strap	1	58-40000-007

- MCL-NetS24	1	SW-42731-01
--------------	---	-------------

Printer Suite A

- Desk Top Bar Code Label Printer Z4000	1	4071-101-01000US
- Operators Maintenance Kit	1	1429

Printer Suite B (Pending Approval)

- Portable Bar Code Label Printer, PT400	1	PT-471-000-10000
- Portable Printer Battery Charger	1	21-32665-26
- AC Adapter for PT400	1	50-14001-006

e. Operational Characteristics. The BCSE, PDT device with its bar code scanning data collection capability, interface with the host system computer for subsequent Defense Property accountability System (DPAS), operations. Additionally, data can be stored in the AIT device during scanning operations and then transmitted directly to a host computer by cable and Communication Docking Station. The BCSE, bar code label printer is used to print linear and two-dimensional bar codes on forms and labels.

f. Power Requirements

<u>Nomenclature</u>	<u>Requirement</u>
Portable Data Terminal PDT7240	Quick change, rechargeable 7.2V, 1600 mAH smart battery.
Desk Top Bar Code Label Z4000 (Pending Approval)	90-265 VAC; 48-62 Hz; 5A fused.
Portable Bar Code Label Printer, PT400	14.4V, 700 mAH, NiCd Standard Battery with a 120/230 VAC, 47- 63 Hz battery charger brick

3. BCSE Support Methodology

a. Supported Information System. The Defense Property Accountability System (DPAS), was chosen by the Under Secretary of Defense (Comptroller), as the DoD migratory system for accounting of Property, Plant and Equipment (PP&E). Additionally, DPAS was subsequently endorsed by the Assistance Secretary of the Navy

(Financial Management/Comptroller) for implementation within the DON as the authorized General Personal PP&E accountability system. The DPAS implementation for applicable Marine Corps Base Activities was completed during FY00. The DPAS has been installed at Bases, Stations and other non-deploying Organizations, responsible for the accountability of Garrison Property. DPAS is currently operated under the cognizance of the Office of the Under Secretary of Defense (Acquisition Technology and Logistics), PP&E Program Management Office (PMO). An evolving interactive multiple user application, DPAS resides on a server that is maintained by the DPAS PMO, and is updated quarterly. The resources for application updates include DoD directed as well as system change requests from DPAS Users. The system is accessible through co-located and geographically dispersed client server workstations via the Local and Wide Area Networks. DPAS transactions are with the exception of some batch processing for recurring reports and processing interfaces to other automated systems, real time. Data queries and reports are available on terminals, workstation printers, or line printers. No additional hardware above the Marine Corps standard workstations is required; the system software can be loaded on the Users workstation; and the DPAS software is compatible with Marine Corps standard workstation software.

b. Concept of BCSE ACTIVATION. The Garrison Property BCSE will be used in conjunction with DPAS property accountability operations. HQMC (LFS) will provide funds for a one time purchase of Bar Code equipment (includes software) and accessories (includes an initial buy of 1 x 2 inch polyester labels and printer ribbon) for Activities using the DPAS. The BCSE will be selected from the listing of standard bar code equipment in the DoD AIT-II Contract, and where practical BCSE will be selected on the basis of its compatibility with the Marine Corps Operating Forces bar code equipment. These assets will be distributed as listed in Appendix B. and receiving Commands are required to provide a copy of the receiving documents to HQMC (Code LFS-1). Before putting the BCSE into service the Command will execute new equipment acceptance and inspection procedures and conduct users training using the training materials and operating procedures available at the below WEB Sites, and training opportunities identified under paragraph 4.b.

(1) SYSCOM web site:

http://www.marcorsyscom.usmc.mil/ait/AIT_Training.htm

Title - Generic AIT Equipment Training

- (2) DPAS web site:
<http://www.dpasweb1.day.disa.mil/webdpas/dphome2.htm>
Title - Symbol Scanner Information (Release 14)
(information for the Symbol 7200 series scanner)

4. Logistics Support

a. Maintenance Support. The BCSE comes with a three-year warranty. It is the responsibility of the User to conduct operator 1st Echelon maintenance. This maintenance includes cleaning, battery replacement, inventory, and replacement of accessories. The BCSE user's manuals, called Quick Reference Guides, over packed with the equipment provides instructions for first echelon maintenance. All other echelons of maintenance will be performed by the Warranty Contractor. Symbol Technologies warrants equipment for a period of 36 months from the date of shipment.

b. Manpower, Personnel, and Training

(1) Personnel Requirements. The BCSE will be operated by Federal and Contract Support personnel employed by the Marine Corps, to perform duties associated with the accountability of Garrison Personal Property Plant and Equipment.

(2) Operator Training Opportunities. The Under Secretary of Defense (Acquisition Technology and Logistics), PP&E Program Management Office (PMO), DPAS PMO offers a comprehensive DPAS, hands-on training program, utilizing the varied DPAS menu modules and features which includes bar code setup and operation. This training is available at DPAS PMO classrooms (on-site) and or off-site at locations determined by the Command.

(a) On-Site Training. DPAS training is conducted at least one week of every month in Columbus, Ohio (training dates are listed at the above mentioned Web Site under, Training Offerings). Personnel attending this course should allocate five days for training. This training and all associated take home materials are offered at no cost to the Command, however, the Command is responsible for costs associated with TAD travel and per diem for its students. Activities that elect to send personnel to this training site are authorized to coordinate directly with the DPAS Training Registrar, DSN 850-8188 or commercial (614) 692-8188.

(b) Off-Site Training. DPAS training can be held on a date and location determined by the requesting Command, a minimum of six students are required for off-site training. While the host site is required to fund the instructor's TAD expenses, the training and all associated, take home materials is offered at no cost to the Command. Activities that elect this method of training is authorized to coordinate directly with the DPAS Off-Site Training Team Leader, DSN 850-8350 or commercial (614) 692-8350.

c. Supply Support. A parts list of items necessary to sustain the Garrison Property BCSE is contained in Appendix D of the ULSS 007799-15, August 2000 and at the above-indicated DPAS WEB Site.

d. Technical Publications (TP). Each component will be delivered with a complete set of commercial documentation. These documents will not be cataloged into publication control systems. Such publications may be obtained directly from the vendor.

e. Computer Resources Support.

(1) DPAS/BCSE PMO Support Services. General support (includes technical, functional and system applications) services are provided 24 hours a day by the Defense Enterprise Computing Center Detachment Dayton (DECC-D-Dayton), Ohio. This service can be obtained by calling the DECC-D-Dayton HELP DESK at DSN 787-3251 or Comm (937) 257-3251.

(2) HQMC (LFS) DPAS Functional Support Help Desk. Marine Corps DPAS/BSCE specific, property management functional support services can be obtained by calling DSN 225-7037 or Comm (703) 695-7037.

f. Warranties.

(1) Warranty Type. The warranty for the major components covers materials and workmanship for three years from the date of government acceptance. Minor components (i.e., batteries, cables, etc.) are warranted for materials and workmanship for one year from the date of government acceptance.

(2) Covered Items. Refer to Appendix C of ULSS 007799-15.

(3) Responsibilities. Refer to paragraph 4.k. of ULSS 007799-15.

(4) Warranty Claim Procedures. Refer to paragraph 4.k. of ULSS 007799-15.

g. System Safety and Hazardous Material. Refer to paragraph 1. of ULSS 007799-15.

5. Actions Required to Place Equipment in Service.

a. Delivery schedules will be posted to the Headquarters, Marine Corps (LFS-1), Web Site (www.hqmc.usmc.mil/lfsweb.nsf).

b. Gaining Commands. Comply with major Command's guidance for placing new equipment in service.

(1) Acceptance Inspection. Perform an equipment acceptance inspection and receipt for all assets received.

(2) Notification.

(a) Provide a copy of receiving report/document to HQMC (Code LFS-1) and MARCORSYSCOM.

(b) Notify HQMC (LFS-1), when the BCSE is placed in service.

(3) Accounting for New Assets. The hardware associated with the BCSE Suite of Equipment is the property of the using command. The Portable Data Terminal (bar code scanner) is a Defense Information Technology Management System (DITMS) reportable asset.

(4) Materiel Defects Reporting. All defects in the received equipment will be reported via a PQDR per MCO 4855.10B with an information copy to HQMC (LFS-1) and MARCORSYSCOM (C4ISR IS). Shipping and packaging discrepancies will be reported via SF 364 (Supply Discrepancy Report) per Secretary of the Navy Instruction (SECNAVINST) 4355.18.

(5) Obtaining Supporting Consumables. Consumables may be ordered via the Marine Corps Supply System or opened purchase using local Garrison property purchasing procedures. Appendix C of ULSS 007799-15, and the above-indicated DPAS WEB Site contain a list of BCSE consumables.

(6) Marine Corps Ground Equipment Resource Reporting (MCGERR). The BCSE is not a candidate for MCGERR.

c. MARCORLOGBASES, Albany. There are no unique requirements for MARCORLOGBASES related to this program.

d. MARCORSYSCOM. There are no unique requirements for MARCORSYSCOM related to this program.
